JULIEN FAIST

JUNIOR FULL STACK
WEB DEVELOPER

PERSONAL PROFILE

I am a Full Stack Developer with an engineering and sales background. After working in the additive manufacturing (3D-printing) industry, I decided to deepen my programming skills from my studies in a 12-week full-stack web development bootcamp at SPICED Academy. There I developed a passion for JavaScript, Node.js and React in particular, but am always interested in learning new technologies.

SKILLS

> JavaScript, TypeScript, Node.js/Express, PostgreSQL, Socket.IO
> React.js/Redux, Vue.js, jQuery, Flexbox, Grid, Handlebars
> Git, GitHub, Jira, Confluence

LANGUAGES

German: Native Proficiency
English: Full Professional Proficiency
Spanish: Limited Working Proficiency
French: Elementary Proficiency

REFERENCES

Name: Mr. Till Hoffmann
Position: Sales Director EMEA

PROJECTS

Travel Football App
React | Redux | Express | 3rd Party APIs | Node
github.com/JLoc91/travel-football-app

A single page application which shows live data of the 5 biggest football leagues in Europe, combined with live weather and hotel data from 3rd party APIs (football-data-API, VisualCrossingWeather, booking-com.rapidapi)

Social-Network
React | Redux | Express | Socket.io | Node | PostgreSQL
github.com/JLoc91/social-network

A single page application social-network made with React with the functionalities of registrating, reseting the password, login, creating a profile, chatting (socket.io), adding and removing friends

Imageboard
Vue.js | Express | Node | PostgreSQL
github.com/JLoc91/imageboard

A single page application made with Vue.js which allows users to upload a picture to an AWS bucket and insert it into the page. Users can comment on the specific pictures and can delete them. So far no registration or login functionality is implemented.

Petition
Express | Express-Handlebars | Node | PostgreSQL
github.com/JLoc91/petition

A Web-Application which allows the user to register and login, to sign a petition and see which other people have signed the petition so far. Furthermore the user is able to delete his/her signature and delete his/her account.

Destination Finder (Work in Progress)
Next.js/React | TypeScript | Bulma | PostgreSQL
Work in Progress

A Web-Application to find and book travel destinations through various filters
